

Bus Surveillance

Spain, 2006

After 911 terrorist attack, security surveillance is already a measure to ensure the safety of all passengers taking public bus in Spain. However, there are some challenges revealed: Firstly, there could be the extra costs of wiring for each IP camera. Secondly, the temperature in the cabinet is relatively high; therefore the commercial switches could have difficulty sustaining under the heating environment .

Why JetNet 3705

- IP31 rugged aluminum case for heat dispersing
- Wide temperature up to 70oC
- 4-port PoE reduces the wiring costs
